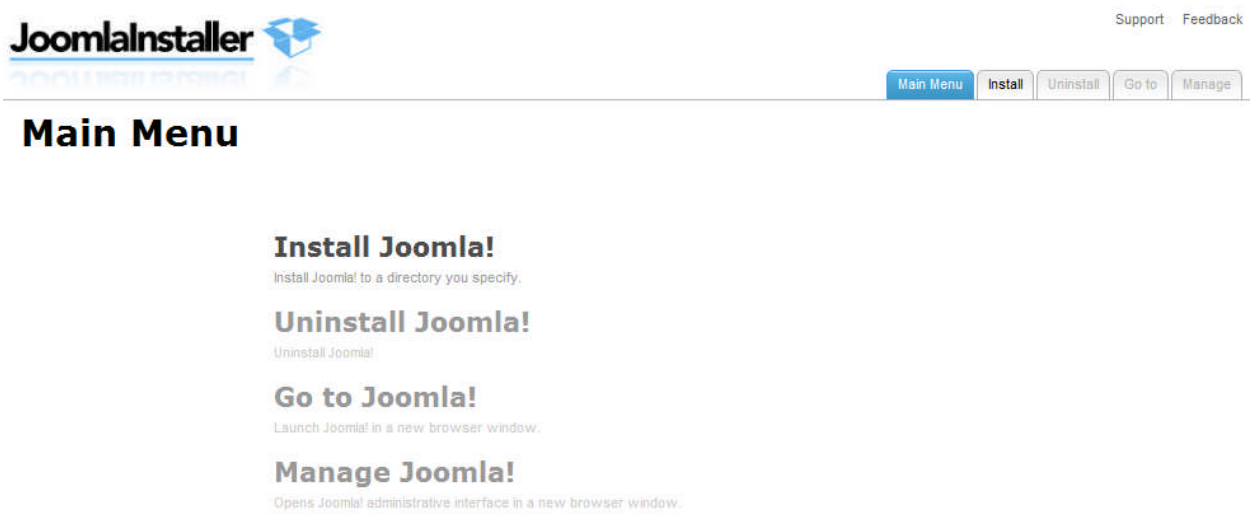
1 Introduction

Joomla Installer is an advanced open source Content Management System (CMS) that enables users to build websites and online applications. This application will easily install a Joomla! CMS to a directory that you specify within your web services account.

TO LAUNCH JOOMLA INSTALLER:

- Click **Joomla Installer icon**.

  The application opens in a new window.



1.1 Navigation

The main menu is located on the top right corner of Joomla Installer:

- **Main Menu:** links you to the Main Page of Joomla Installer
- **Install Joomla!:** links you to the page where you can start installing this application
- **Uninstall Joomla!:** links you to the page where you can uninstall this application
- **Go To Joomla!:** links you to the page where you can access this application and start using it after installing it.
- **Manage Joomla!:** links you to the page where you can manage this application
- **Support:** opens online help files for Joomla Installer in a new window
- **Feedback:** allows you to send feedback concerning Joomla Installer

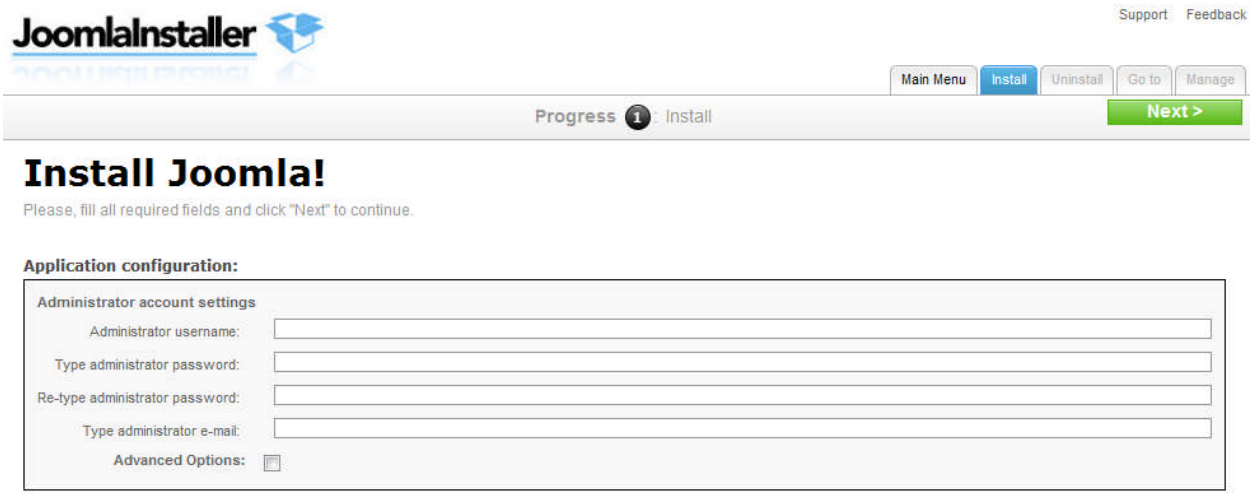
2 Joomla Installer

2.1 Install Joomla!

Allows you to install Joomla! on your website.

TO INSTALL JOOMLA:

1. Click **Install Joomla!**.
2. Set up administrator account.



- **Administrator username** – enter administrator username
- **Type administrator password** – enter administrator password
- **Re-type administrator password** – re-enter administrator password
- **Type administrators email** – enter administrators email
- **Advanced options** – allows you to select database, database user and directory.

  - **Database User** – select a database user.
  - **Database Name** – select database name.

Welcome to Joomla!
Congratulations on choosing Joomla! as your content management system. To help you get started, check out these excellent resources for securing your server and pointers to documentation and other helpful resources.
Security
On the Internet, security is always a concern. For that reason, you are encouraged to subscribe to the Joomla! Security Announcements for the latest information on new Joomla! releases, emailed to you automatically.
If this is one of your first Web sites, security considerations may seem complicated and intimidating. There are three simple steps that go a long way towards securing a Web site: (1) regular backups; (2) prompt updates to the latest Joomla! release; and (3) a good Web host. There are many other important security considerations that you can learn about by reading the Joomla! Security Checklist.
If you believe your Web site was attacked, or you think you have discovered a security issue in Joomla!, please do not post it in the Joomla! forums. Publishing this information could put other Web sites at risk. Instead, report possible security vulnerabilities to the Joomla! Security Task Force.
